Engineering and Mining Journal

Index to Volume 129 - - - January 1 to June 30, 1930

Explanatory Note

THE general index to this volume is preceded by a list of the editorials published in the volume, and is followed by an index of authors. In the general index editorials are denoted by the letter "e" and news items by the letter "n." Following is a list of the pages included in the numbers of the volume by date:

January 9 ..... 1 to 54
January 23 ..... 55 to 108
February 8 ..... 109 to 168
February 24 ..... 169 to 222
March 8 ..... 223 to 276
March 24 ..... 277 to 330
April 7 ..... 331 to 382
April 24 ..... 383 to 436
May 8 ..... 437 to 488
May 23 ..... 489 to 540
June 7 ..... 541 to 590
June 23 ..... 591 to 642

EDITORIALS

Aerial surveying helpful in geological investigations 171
Affording mining students practical experience 384
Alaska Juneau enters a new phase of its career 332
Alertness, as well as fitness, qualification for survival 592
The Andys in mining 490
Automatic control of pumping underground 56
Better annual report — artistically and financially 278
Borax industry benefits by expanded applications 170
Can the low-grade gold ore deposit be exploited? 491
Changing concept of research 57
Chromium, nickel and stainless steel 252
Co-operative microscopic mineral research. 170
Consistency or inconsistency in estimating ore reserves 225
Copper appears to be the goat 223
Cost standards and personal element 593
Curtailment, unemployment and the five-day week 58
Development of African platinum teaches a lesson 224
Drop in the price of copper 383
Ebbing copper tide begins to turn 171
Echoes of the Carson reverberatory litigation 332
Effecting operation economics by the use of zeolites 279
Electrification means progress and greater economy 385
Engineer must develop personal salesmanship 57
Engineering and Mining Journal—historical summary 1
Ethics and the employment of engineering graduates 277
Futile waste in friction and unreason 591
Future of the Pacific Coast iron and steel industry 56
Geographical Society founded in Canada. 223
Gold production and commodity prices 277
Good reputation must be guarded 543
Gospel of simplified practice continues its winning way 541
How much does sickness cost the employee? 489
In defense of one type of noise 334
Is metal mining declining in the U. S.?.. 109
Light in the treatment of disease 385
Manganese producers must make good 440
Mining claims in national forests 541
Mining company should make the most of its resources 491
Mining towns need a pure water supply.. 170
Mr. Cates assumes new and greater responsibilities 384
"Money-minded" and research in pure science 542
Morro Velho pioneers in conditioning air 591
"New process cuts radium cost, claim" ... 333
New uses found for bentonite and barite.. 224
Opportunity remains for fundamental research 593
Phosphate exporters lose ground in foreign markets 490
Physicist matches the boast of Archimedes 386
Plant and shops require adequate heating 58
Plea for uniformity in measurement units. 439
Plea for a United States Court of Patent Appeals 225
Political and commercial mineral policies to be studied 333
Production costs in Rhodesia still largely problematical 542
Progress in topographical mapping might be accelerated 226
Prospects for international metal cartels.. 169
Quicksilver cartel offers £5,000 prize.... 224
Rare-metal research an example of versatility 278
Senate asks the silver miner to disregard the facts 331
Should an embargo on war supplies be limited to mineral products? 226
Social center for mining engineers in New York 440
Social engineering as an essential foundation 169
Stimulating the demand for silver 55
Tariff on silver 437
Telephone expansion programs and copper consumption 334
Tin producers exhibit more co-operation with prices low 331
Tri-State metallurgists sponsor nomenclature reform 489
Uniform engineer—registration laws sought in new movement 332
Varies technique of mining promotion 279
Waiting for the consumer to buy 56
"What is not yet may be" 543
With all thy getting, get understanding.... 385
Zinc production and national aspirations.. 592
Zinc sulphate as a weed killer 333

GENERAL INDEX

A

Abana Mines—To build 300-ton mill....n317
Accidents and Accident Prevention
Accident at Climax n629
Device to protect drill-sharpener operators *21
Mining death rate low in Arizona in 1929 n96
Accidents, see also Safety
Accounting—Estimating head assay from quicksilver feed. A. B. Foote 407
Aerophoto Corp.—Airplanes to aid mining.n162
Africa—Land of opportunity *32
Asbestos plant forced to close n633
Ahumada Lead—Stops pumping n371
Airplanes—Aerial surveying helpful in geological investigations e171
Air transport aids mining in New Guinea *594
To transport dredges to New Guinea Placer field n265
Air Separation—Effective in the nonmetallic mineral industries. Rubert M. Gay *65
Alaska—Survey announces program for coming season n577
Alaska Juneau—Acquires more ground....n371
Enters new phase of its career e332
Almaden Mines—Season curtailed n526
Aluminum—1929 review. D. B. Hobbs.... 116
Amalgamation—Profitable. C. Woods.... 356
Amber mining in Germany. F. Prockat.. *305
American Engineering Council — Backs legislation on employment and power situations n530
American Institute of Mining and Metallurgical Engineers
California section meets n579
Convention 204
Meeting of New York Section ..... n57€
San Francisco section meets n426
Utah section meeting n95
American Metal—Drill hole at Pecos....n211
Pecos cuts output in half n44
Unwater Cuban gold property n476
American Smelting & Refining — Closes Asientos unit; options D'Inguaran copper n265
Closes smelter at Matehuala n530
East Utah option exercised n95
Garfield Smelter. J. B. Huttl..... *335
Murray lead smelter. J. B. Huttl.... *509
Options Frisco. Lulu n318
Options Pingos copper n271
Rain permits resumption of smelting at Matehuala n627
Starts new mill at Chihuahua n477
Tamaya tonnage too small for large mill.n213
American Society of Mechanical Engineers—Change: its significance to engineering and economics 459
American Zinc Institute—Annual meeting..n423
Amethyst lease preparing to suspend..... n629
Amparo Mining—Reserves low n479
Amulet Mines—Sinking shaft for mining "F" orebody n45
To continue producing n527
Anaconda Copper Mining Co.—International Smelting work at Park City continued. n580
Safety first at Great Falls. E. Young... *499
Andalusite group of minerals. A. V. Petar.. 561
Annie Laurie Consolidated Gold — Starts work at Sevier, Utah n319
Arizona Asbestos Assn. — 16 year safety record n267
Arizona Commercial—Production near end. n319
Asbestos—1929 review. N. R. Fisher ... 116
Ashanti Goldfields—Increasing capacity.. n208
Assay offices — Four Western offices eliminated n97
Atlas Mining—Strikes ore n372
To build tramway n479
Australia—Mining in Australasia improves. P. G. Tait 147
Science meeting to be held in May..... n43
Australasia—Alluvial gold areas attract attention n375

B

Bagdad Copper—Enlarging mill n373
Banner Development—Palisades plant resumes n576
Barite—New uses for bentonite and barite. e224
Base Metals—High recovery obtained from complex ore n45
Delays increase in mill because of market n633
Bearings—Anchoring babbitt in bearings.. 498
Belcher Island—Railroad will help develop n98
Bell Silver-lead—Sold n208
Bella Oak Mines—Gould operating..... n578
Belmont Copper Mining—Closes property. n527
Bentonite—New uses for bentonite and barite e224
Berenguela Tin Mines—To sink shafts.... n165
Beryl—Survey Colorado find n210
To mine in Austria n210
Big Jim Mines—reopening at Oatman.... n321
Blasting—Chain screen advantageous in tunnel blasting — drilling platform speeds work *358
New methods proves satisfactory 513
Blower—Homelite portable blower *91
Bluebell Mines—Strikes orebody n320
Boleo Copper—Averts labor strike..... n162
Boliden District—Start new copper smelter. n528
Bolivia—Government relief for tin mines.. n374
More tin mines close n583
Book Reviews and Digests
Abrasives 622
Asphalt and allied substances 622
Bearings metals and bearings 622
Diatomaceous earth 258
Economic geology 258
Geochemische migration der elemente... 35
Geochemische Migration der Elemente.. 622
Geologic map of Kentucky 259
Geologic structures 35
Gypsum resources and gypsum industry of N. Y. 259
Industrial and commercial Germany.... 258
Mineralogy 520
Mining of alluvial deposits by dredging and hydraulicking 258
Mining methods 520
Mining year book 520
New Brunswick, Canada 622
Novel change obviates compressed air shortage 33
Ore deposits of magmatic origin 35
Platinum and the Transvaal 11
Recovery of zinc from ferrite compounds in the electrolytic zinc process..... 259
Soviet economic development and American business 520
Tin 36
Trend of flotation 259
Borax—Industry benefits by extended applications e170
Bore hole facilities sinking of shaft..... *611
British Columbia Mines—Close, brokers arrested n165
British Metal Corp. — Supporting tin stabilization n270
Broken Hill—Companies unite in zinc contrast n531
Finds new ore n47
Situation serious n480
Buchans Mining—To double concentrator capacity n269
Buena Tiera—Increasing output n425
Bunker Hill Smelter—Sintering machine igniter perfected *87
Sintering machine igniter perfected.... *31

New record output in Canada. S. J. Cook 141
Non-metallic minerals in Canada. M. F. Goudge *452
Canadian Institute of Mining & Metallurgy —Meets n320
Meeting n96
Canisteo Cliffs—Unwatering mine..... n95
Castle-Trethewey—Cut in program..... n92
Caves—Carlsbad, N. M. E. H. Robie....*496
Cement—Preparation and resistance of cement and gypsum plasters in wet copper mines. T. E. Smith 248
Industry investigates metallurgical grinding methods. A. Anable *188
Cementation process. G. A. Voskule..... 390
Central America—1929 review. C. Butters 148
Central Patricia—To sink shaft to 500 ft.. n43
Central Rand labor force cut n48
Century Zinc Co.—Glass for launder lining *33
Chain feeder in underground chute.....*313
Chamber of Commerce of the U. S.—Meeting n476
Champion Reef Gold Mine—new orebody cut n527
Chief Consolidated—Eureka Lily opening new lead ore on 770 level n529
Chile—Mining bank of Chile 17
New mining code.....n213
Chile Exploration—Add three locomotives..n477
China—Constructing a small mine in China *19
Chisel—Safety guard for cold chisel..... *78
Christmas Copper—Work centers on new shaft n578
Sinks new shaft n317
Chrome—Domestic chrome mining. W. P. Lass *77
Chromite—Montana's chromite reserve. D. P. Bates c571
Chromium—Nickel and stainless steel....e252
Cinco Minas—Closes mine and mill in Jalisco n320
Classification—Metallurgical efficiency of a classifier. A. C. Halferdahl 548
Cleary Hills Gold Mines—Finds extension of Rhoads-Hall orebody n318
Climax Molybdenum Co. building new crushing plant n525
Clinton-West—Handling 400 tons n44
Coal-loading machine *625
Cobalt—1929 review. G. C. Bateman.... 116
Coeur d'Alene district—Copper struck....n477
Golconda hoisting new shaft n162
High grade in Sherman raise.....n162
Several mines close n370
Sunshine reserves increased n209
Colombia—Placer mining in Colombia. S. del Rio *354
Colorado-Mexico Mining—Treats dump ...n580
Two high-grade gold strikes n370
Colorado Fuel & Iron—Change Sunrise mine to caving n94
Compressed air chart. S. C. Mifflen..... 353
Compressed air—Meters will detect inefficient use of compressed air.....*521
Deepest mine in Americas adopts air conditioning *617
Efficient compressor plant installation..*603
Novel change obviates air shortage.... 33
Compressed air, see also Ventilation

Concentration

Air separation effective in the nonmetallic industries. Rubert M. Gay..*65
Electrolytic copper from copper concentrate. W. E. Greenawalt..... 241
Forerunner of the modern ball mill.... 85
Leveling milling equipment 191
Murray lead smelter. J. B. Huttl.....*509
New conveying practice at the Bunker Hill smelter. A. F. Beasley *281
Novel crusher foundation proves economical and efficient *406
Phosphate mining and milling at Conda, Idaho. J. B. Huttl.....*195
Progress in cyaniding and ore dressing..*13
Quarrying and milling gypsum. G. L. Lincoln *181
Sintering machine igniter perfected.... *31
Sintering machine igniter perfected at Bunker Hill Smelter *87
Sintering machine ignition stoves. F. M. Wichman 197
What power does the cone crusher require? 261
Concentration, see also Flotation

Concentrator

Concentrator—Allenby concentrator of the Granby Co. H. R. Taylor *175
Anyox concentrator of the Granby Co. W. B. Maxwell *343
Early flotation results at Anyox. H. R. Robbins c570
Coniaurum Mines—Sinking deep winze.... n43
Consolidated Coppermines—Additional treatment facilities needed.....n422
Automatic hoisting at the Emma Nevada shaft. J. E. Borland *604
Consolidated Mercury Mining—Build quicksilver plant n479
Consolidated Mining & Smelting — Best results at Coast and Big Missouri ...n372
Bonds Ikeda group n209
Development plans n49
Drilling Sullivan orebody n477
Options area adjoining Allenby n529
Prepares to drive new tunnel at Molly Gibson n633
Stops work at Mammoth n98
Constitution Mining & Milling — Water hampers n95

Conveyors

Improvements at New Cornelia—1. G. J. Young *608
New conveying practice at the Bunker Hill smelter. A. F. Beasley.....*281
Transporting drill steel underground. A. B. Foote *244
Vibration conveying. A. Zentner.....c415

Copper

Appears to be the goat e223
Assured expansion of consumption paramount need for the future. A. Notman 117
Canadian copper expansion to reach peak this year n633
Costs at Miami copper 348
Drop in the price of copper.....e383
Ebbing copper tide begins to turn....e171
Economic aspects of the copper industry. L. C. Graton 192
Electrolytic copper from copper concentrate. W. E. Greenawalt 241
Michigan copper shipments n636
Northern Rhodesia copper belt. C. M. Norman 284
Price of copper 402
Production and consumption 303
Production 1925-1929 110
Status of the porphyries—present and prospective. S. D. Strauss 514
Telephone expansion programs and copper consumption e334
World's oldest industrial corporation..*492
Copper District Power—Interested in Michigan power firm n527
Copper Range—Drills two areas n373
Trimountain property closed n530
Corporation—World's oldest industrial....*492
Cost standards and the personal element..e593
Cripple Creek—Ship record high-grade ore.n211
Crushing, see Concentration
Cuba—1929 review. L. C. Porter..... 149
Cyanite—In North Carolina. A. F. Greaves-Walker 173
Cyril Knight Prospecting—To drill nickel-copper on coast of Hudson Bay.....n477

D

Denver County Mining Assn. meets..... n44
Denver & Rio Grande Southern R.R.—reopening Vance Junction n629
Dickens Consolidated—Stops operations... n94
Digest of Current Literature....37, 255, 361, 468, 518, 618
Disputada Mining increasing capacity..... n48
Starts new mill unit n164
Ditch—opening drain ditch in a caved drift*247
Dome Mines—Awaits McIntyre results... n93
Mill to operate in October.....n478
Reserves increased n320
To rebuild mill n372
Drift—opening drain ditch in a caved drift.*247

Drills and Drilling

Computing drill-hole date in placer prospecting. W. W. Avery *493
Diamond core drill standards. R. D. Longyear *470
Drilling platform speeds work *358
Drawings — Diagram simplifies changing scale dimensions. E. F. Seaman 457
Dump—Differential train for waste disposal and stock piling *623
Dust—In mine air. James Boyd..... 387
Duthie Mines—Closes mill n266

E

Economics—Supply and demand, or stabilization? J. R. Finlay..... 568
Electrical industry show achievements... 40
Electrification—Electrified haulage effects economies in Utah Copper mine. Gail Martin *26
Means progress and greater economy....e385
Electrolytic Copper—From copper concentrate. W. E. Greenawalt 241
Electrolytic Zinc—Rosebery Mill completed.n478
Electronics—Physicist matches the boast of Archimedes e386
Elutriator—Its application to ores. Clemmer & Coghill *551
Embargo on mineral products in war?...e226
Empire Chief Mining—Cuts oreshoots....n579
Empire Mining & Metallurgical Congress in South Africa *32
Third triennial congress opened.....n375

Employees

How much does sickness cost the employee? e489

Q

Quicksilver

Cartel offers £5,000 prize e224
Estimating head assay from quicksilver feed. A. B. Foote 407
Nevada output n630
World output declines—American production increase. H. W. Gould 124
Quincy Mining—Pushing development.... n95
To open up 91 level.....n372

R

Radium

Carnotite area offered to government..n427
Government production n316
"New process cuts radium costs, claim".e333
Railroads—see Transportation 129
Rand dividend prospects good n582
Production, costs and profits in 1929.. 280
Rawley Mine—repairs tramway n165
Ready Cash—lease property n421
Reeves-McDonald Mining—balks at Pend Oreille Power plan n529

Refining

Copper at El Paso, Texas *5
Furnace and casting equipment of the new Nichols refinery. Edw. H. Robie *73
Improving Merrill press precipitation..*346

Research

Beneficiating manganese ore by volatilization 414
Co-operative microscopic mineral research e170
Flotation research on the relative activity of the various constituents of crude cresylic acid. G. L. Landolt, E. G. Hill and A. Lowy 351
Geological survey obtains funds for more research n576
"Money-minded" and research in pure science e542
Opportunity remains for fundamental research e593
Political and commercial mineral policies to be studied e333
Pyrometallurgical testing 179
Rare-metal research an example of versatility e278
Taylor to act as consultant in x-ray study of minerals n527
Retort—charging machine. G. L. Spencer, Jr. *503
Rhodesia—Production costs in Rhodesia still largely problematical e542
Mine areas prepared to combat diseases.n425
Rhodesia Broken Hill—making profit....n531
Rhodesian drilling results n321
Rhodesian Nickel Corp. profits for 1929.. n48
Rio-Tinto—declares bonus n374
New copper concentrator n475
Roasting—see Metallurgy
Roan Antelope—increases rate of mine development work n634
Roman Group Mining—sue over Sierra County n321
Roros Copper—smelter closes n267
Rubber—lining rubber, transmission and air hose 90
Unusual qualities of new rubber recommend it for engineering applications. 262

S

Safety

Anti-climbing guard protects motorman *607
International safety contests to be held in Louisville n425
Make annual awards to mines and quarries n526
Matahambre Mine has safety first campaign 300
Mining company issues leather gloves to employees 254
Morenci Branch wins Phelps Dodge contest 286
Morenci mechanical department celebrates record n98
Practice and welfare at Great Falls. E. Young *499
Records at Hanna mines n98
Remarkable rescue. Arnold Gustafson. 71
Work in mining at depth in Kirkland Lake 251
See also Accidents and Accident Prevention.
St. John del Rey—increases ore reserves in 1929 .....n478
Increasing reserves n162
St. Joseph Lead—building mill at Sylvia Lake Property n95
Building zinc plant n526
Sylvia Lake mill started n162
To build in Argentina n373
Salt Lake Station installs x-ray laboratory. n46
Sampling—Commercial ore sampling. O. B. Hofstand *233
Pipe for sampling Dorr thickener *399
San Juan County—shipments still high..n579
Shipments at good rate despite shutdowns n628
San Nicholas—closes mill n630
Santa Elena—to build mill n163
Sarita Mining & Power Co.—plant finished n629
Schmidt Bullion Mining—starts n208
Screen, vibrating *40
Screen—Evans-Stephens unit for treating gravels and sands 91
Security Mining—shaft strikes water n479
Setscrews—why they slip 450
Seven Troughs Gold—finish mill n317
High-grade ore struck n527
Testing mill n632
Shaft—position, relation of ground movement 34
Sinking in Tennessee. L. Weaver *301

Shafts

Bore hole facilitates sinking of shaft...*611
Keeping shaft sets aligned in bad ground*461
Shaft plumbing with two wires in one shaft. P. Erimesco c312
Sinking circular shafts. W. G. C. Nixon 388
Shamva Mines—to suspend work n99
Shattuck Denn—to start mining Ophir area n96
Sheldon Mining—curtailing output at mine and smelter n526
Storm delays smelter start n96
Shenandoah-Dives Mining—at capacity ..n478
Operation of mill started n212
Sidney Mining—strikes new oreshoot.... n44

Silver

Commodity nature of silver. H. M. Bratter 393
New uses for silver. J. Brinn.....c621
Pittman's tariff viewed skeptically.... n97
Production 1925-1929 110
Production in 1928 356
Recent quotations must be viewed in light of new world conditions. B. White 112
Research on silver. H. F. Bain 199
Research on silver alloys. J. A. Fulton.c312
Senate asks the silver miner to disregard the facts e331
Senator Pittman offers remedy for silver n94
Tariff on silver e437
Silver King Coalition—new ore channel...n266
Starts driving new tunnel n95
Strainer on pump suction cuts maintenance costs *25
Silver Shield Mining—exploring claims...n370
Silverton mines reopened n44
Slide—rule users, hints 464
Soldado Mill to start in April n48
Sonora Mine—three die in raid n581
South Africa—Asbestos output gain expected n47
Mining in South Africa and Rhodesia. O. Letcher 142
South America—Mining in 1929. S. D. Strauss 145
South Kalgurli Consolidated — combating under-roasting in sulpho-telluride ore treatment 232
South West Africa—tin found n214
Southwest Metals — Humboldt smelter started n163
Standardization—diamond core drill standards. R. D. Longyear *470
Gospel of simplified practice continues its winning way e541
Metallurgical nomenclature in the Tri-State district. M. D. Harbaugh.....c621

Steel

Chromium, nickel and stainless steel...e252
Dipper of manganese steel *366
Machining manganese steel 315
Manganese steel use increasing 41
Testing sheet for weldability 508
U. S. Steel Corp to make.....n636
Why the block test for drill steel? A. H. Hubbell 506
Stanley Siscoe Gold—drill area n97
Sulpho-telluride ore combating under-roasting 232
Sulphur mining at Newgulf, Texas. G. G. Hollins *83
And pyrites. R. F. Bacon 120
Sunshine Mining—installing new hoist...n369
30 tons daily n266

Surveys and Surveying

Aerial photography and topographic mapping. A. W. Newberry c312
Depth finding by magnetic triangulation. N. H. Stearn 396
Progress in topographical mapping might be accelerated e226
Topographic map for Kentucky.....n321
Swansea Mine—build mill n369
Switches—Reliable track switch *413

T

Tanami Gold—report awakens interest .. n99

Tariff

Arentz proposes silver embargo as substitute for tariff.....n526
Changes n476
New zinc tariff includes ores of more than 3 per cent n266
Pittman's silver tariff defeated n209
Pittman's silver tariff is passed n316
Senate raises zinc duty n213
Tariff on silver e437
Taxes—Mexico passes new mining tax law n46
Tax relief for the prospector. Granville S. Borden 69
Teck-Hughes—new shaft to reach objective in May n424
To enlarge mill n581
Telephone—service available to South America n425
Temperature—ventilation and temperature in deep-level mines. E. C. Ranson 390
Tennessee Copper—reopening its Polk County mine n427
Texas Potash—plans mining of 500 tons daily n427
Thunder Mt. District—new interests buy gold mines n528
Timmins safety station ready n93

Tin

Boring for tin in Malaysia 304
Output of principal producers increases. E. B. Scott 122
Producers exhibit more co-operation with prices low e331
Tin Producers Assn.—meet n428
Tintic District—gold output rises n580
Shipments increase n42
Tintic Standard—ends drilling n580
Installing new pumping equipment.... n96
Tombstone Extension—ships lead ore to Douglas n369
Tom Reed—shaft reaches 1,000 ft. n44
Tonopah Extension—output increased ... n97
Still at work n321
Tonopay Mining—to exploit Nicaragua copper n211

Tonopay Nicaragua—future depends on price of copper n528
Tocopilla Mining—profits in 1929 ..... n637
To build mill n632
Toric Mine—complete raise n321
Tramway — Improving on rope-tramway location by using angle towers and stations. Fred C. Carstarphen *59
Rope-tramway location. E. B. Durham 198

Transportation

Differential train for waste disposal and stock-piling *623
Locomotive horsepower chart. S. C. Mifflen 599
Locomotive sand pipe keyed to box 64
Mine transportation of limestone. R. W. Smith *462
Timken roller bearing locomotive *574
Trolley-type locomotive with cable-winding device *544
Upkeep of electric locomotives. J. S. Dean 564
Weight chart. S. C. Mifflen 505
Treadwell Yukon—cut output at Tybo mines n479
Report shows progress at company's mines n422
To expand scope of Mayo operations ... n267
2,000 ton mill planned n317
Trepca Mines—building mill at Stantrg mine n49
Tri-State District—metallurgists sponsor nomenclature reform e489
Needless waste of metals said to occur in smelting ores 64
Output about 75 per cent of production rate a year ago n576
Trucks—crude oil engines drive these trucks 41
Handles material cheaply and safely ... *458
Tungsten Products—resumes n630
Tunneling and development. C. S. McLean 391
Union Copper—starts Tepezala mill n211
United American—cuts ore n526
United Gold Mines—new strike at Cripple Creek n421
University of Utah—awards six mining fellowships n628

U

U. S. Bureau of Mines

Annual supply bill n163
Appointments of more consultants n44
Large-scale tests to start on Southwestern potash n579
Preparing non-metallic surveys n528
To study earth movements n577
U. S. Dept. of the Interior—survey announces program for coming season in Alaska n577
U. S. Geological Survey—status of mineral-bearing public lands 82
U. S. Smelting, Refining & Mining—Real del Monte completes centralization at Pachuca n371
U. S. Vanadium—remodel mill n368
United Verde Copper—starting work on main hoisting shaft n94
United Verde Extension—abandons five-day week n475
Cuts ore in Idaho n477
No new ore found n213
Valuation case n369
Universal Exploration—plant complete ... n210
Utah Copper Co.—Cates protests against tax raises n426
Electrified haulage effects economies .. *26
Utah Ore Sampling Co.—commercial ore sampling. O. B. Hofstand *233
Uvada Copper Mines—driving new tunnel. n580

V

Valves—operating overhead from the floor. *567
Vanadium Corp.—development work to start n208
Van Dyke Copper—plans increase n44

Ventilation

Deepest mine in Americas adopts air conditioning *617
Mine ventilation chart 30
Mine ventilation systems on the Witwatersrand 357
Morro Velho pioneers in conditioning mine air e591
Temperature and ventilation in deep-level mines. E. C. Ranson 390
Ventures, Ltd.—Opemiska drilling progresses n129
Village—Robinson deal opposed n99
Vipond Consolidated—crosscutting at 500 ft. n267

W

Waite-Ackerman-Montgomery—check drill results n372
Crosscutting to new orebody n265
Waste—mining company should make the most of its resources e491
Futile waste in friction and unreason ... e591

Water

Care necessary in treating boiler feed water with zeolites Neckar Water Softener e415
Mining towns need a pure supply e170
Problems. Louis Bok 391
Proportioning flow in softening feed water *364
Weights—plea for uniformity in measurement units e439
Weight conversion. G. A. Roush 245
Welding—facilitates welding pipe lines *625
West Kootenay Power & Light—to build on Pend Oreille n267
Wiluna Gold—new Western Australian enterprise 513
Road near completion n49
Shaft below 600 feet n374
Witpoort Gold Areas—to push development of its area on Far East Rand n531
Witwatersrand shatters all output records in May n634
World Silver Congress—to meet at Mexico City n627
Wrights-Hargreaves—output in January—n212
Remodeling plant n478

Y

Yellow Aster adds cyanide unit n43
Yugoslavia—Lead-zinc property developed. G. L. Walker *295

Z

Zeolites—effecting operation economies by use of zeolites e279

Zinc

Consumption fails to keep abreast with enlarged production. J. D. Conover .. 119
In the Southwest. O. C. Ralston 467
Machine charges zinc retorts *624
Production 1925-1929 110
Production and national aspirations e592
Roasting with sulphuric acid increases recovery. B. H. Strom 79
World Zinc outlook practically unchanged 636
Zinc sulphate as a weed killer e333
Zinc Corp.—closes acid unit n162
